

Universal Pump Mounting Plate

with adjustments to lower or raise the pump to fit the desired and proper submergence for best pump performance.

Heavy Duty Pedestal Jack

can be anchored to a concrete pad or post for added stability, swivel hitch to help while backing over banks and into canals.

About

General Irrigation & Dewatering of Oakes, ND is licensed in sales, design and installation of deep well and submersible pumps. We have been selling and installing electric pumps, diesel driven pumps, and PTO pumps for irrigation and industrial applications for over 50 years. We have extensive knowledge in handling water and a sub-surface and surface dewatering division.

Our company needed a pump for our rental operation. A pump that could be towed easily, pump a lot of water quickly and be affordable. Drawing from 50 years of knowledge in the irrigation and pump business, Dana Rosendahl-President/Owner, designed the Dyna-Flo pump. He used technologies from deep well turbines, submersibles, centrifugal pumps, and from sewer and trash handling pumps. Features like the neoprene lined turbine bearings will assure a long life. Each of the bearings are backed up with a sand collar, which prevents debris and grit from flowing into the bearings.

Dyna-Flo pump has been building the PTO pumps since 2008. We have surpassed 100 pumps and well on our way to over 200.

Floating Pump

www.dynaflopump.com

8973 Highway 1S | Oakes, ND 58474 | 701-742-3224

Pull Pins

Just pull two pins to separate the floats from the pipe for storage and maintenance.

Safety Pin

towing mode, and to hold the wheels up while pumping.

3" Air Vent - Vacuum Relief
to prevent air hammer.

Universal Discharge
to fit your pump site.

Hydraulic Cylinder to Lower & Raise the Floating Pump

Length of the Floating Pump can be tailored to fit your specific pump site.

Cat Walk with Hand Rail allows the operator access to the pump end to make adjustments when needed.
